

Meeting basement egress requirements is about to get a whole lot easier . . .

Introducing Bilco's NEW **stakWEL™** Window Well System

The stakWEL window well system consists of individual modules that simply slide together for fast and easy installation. This flexible system allows you to stack modules to accommodate virtually any foundation depth.

Unique "Grip/Step" design features convenient handle and gusseted step to meet emergency egress requirements

Mounting flange includes preset key holes for fast and secure attachment to a window buck or foundation

Neutral driftwood color and pebbled interior finish will compliment the interior of any home

Added Benefits:

- Corrosion resistant construction at "Steel-like" prices
- Standard 5-year Warranty
- Optional Clear Polycarbonate Cover available

Four module stack shown. Modules can be stacked up to six units high. See reverse side for details and dimensions.

High-density polyethylene molded construction will never rust, rot, or discolor. Provides homeowners with many years of maintenance-free service

Overlapping ribs and innovative "Slot and Tab" design ensure proper alignment of modules and ease of installation

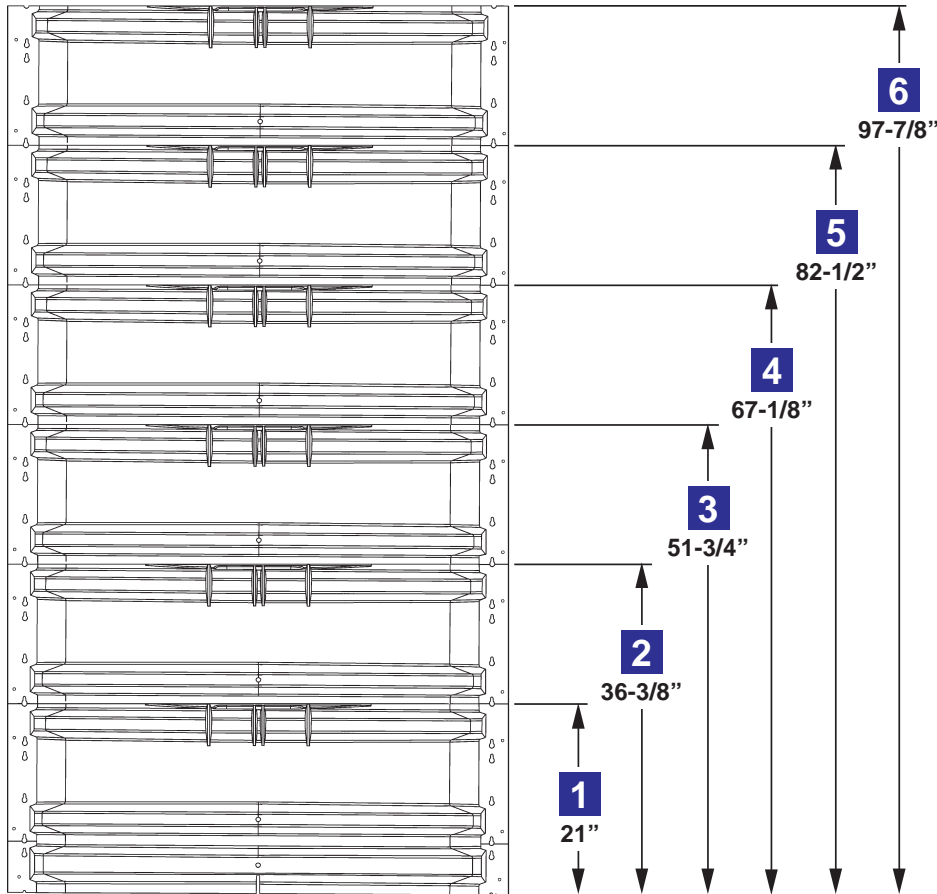

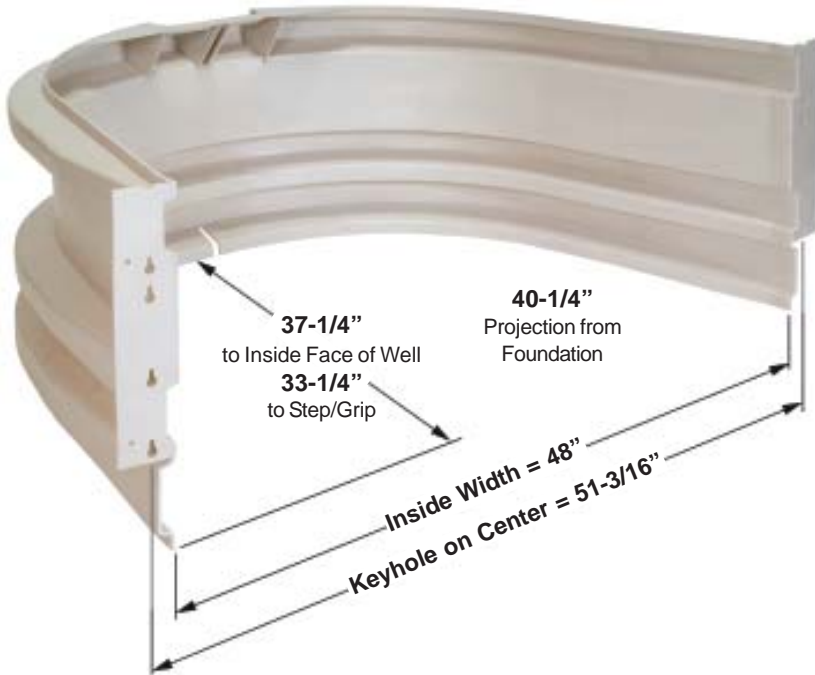

Imagine . . .

What Bilco can do for your basements

Sizes and Dimensions

One Module does it all

Modular system can be used on foundations of up to ten foot and greater in depth.

Single modules work well with 16", 20" & 24" Utility windows.

Simply select the number of modules to determine the assembled well height
